## REASONS YOU SHOULD CONSIDER THE DRAPER EXPERT AIR TOOL RANGE

These tools are designed for use in the professional workshop. With features to reduce weight, noise and vibration ensuring they are comfortable to use, yet strong enough to get the job done.

Check out the specification panels for each tool to see how hard we've worked to get them right.

Silenced air exhausts to reduce workshop noise

Rotating air inlet to prevent air line tangles

Lightweight composite bodies give less user fatigue

Soft-grip handle for comfort and reduced vibration

Compact size for "go anywhere" work

Variable speed for versatility

### PAUL SAYS

Hand Arm Vibration (HAV) is a commonly reported workplace injury. From July 2010 the daily UK Exposure Limit Value (ELV) is 5m/s<sup>2</sup> A (8). These Draper Expert air tools can help assist in reaching this demanding new legislation. ## SAFETY INFORMATION

Only black finish impact sockets specifically made for the purpose should be used with impact tools. Chrome plated or normal sockets are designed with a thinner socket wall for improved access to fixings and are not designed to cope with the stresses caused by the force of an impact wrench and may shatter, resulting in personal injury.

## DAVE SAYS

Our air tools, like your car, are precision manufactured, therefore they require oil to lubricate and cool them.

They should be supplied with a filtered air supply from which the inevitable condensed water has been removed. This will ensure long and trouble free operation.

See page 585 to order filters, regulators and lubricators.
